

Namma Yantra Share App

Overview

The Namma Yantra Share app (part of the broader Namma Yatri ecosystem) is a community-driven ride-sharing and mobility platform designed to connect passengers directly with drivers, mainly autos and cabs, without traditional middlemen.

At its core, the app follows a “zero-commission” or “direct-to-driver” model, meaning passengers pay the driver directly and the platform does not take a cut from each ride. Instead, drivers typically pay a small subscription fee to use the service.

Key features and concept

- Direct driver connection: Passengers are matched directly with nearby auto/cab drivers.
- No commission system: Drivers keep almost the entire fare earned from trips.
- Transparent pricing: Fare is shown upfront, and users can compare options before booking.
- Open network model (ONDC-based): Built on India’s open digital commerce ecosystem to support interoperability.
- Driver-focused system: Designed to increase driver earnings and reduce dependency on high-commission aggregators.

Purpose of the app

The main goal of Namma Yantra Share is to:

- Improve first and last-mile connectivity (especially near metro stations and local transport hubs)
- Provide fair income opportunities for drivers
- Offer passengers a more affordable and transparent ride-booking option compared to traditional apps

Simple summary

In short, Namma Yantra Share is a driver-friendly, commission-free ride-sharing app that aims to make local transport more fair, direct, and affordable by removing intermediaries and using an open network system.
